

# CONTACTLESS TEMPERATURE SCREENING STATIONS

- 1** - Temperature measurements are taken automatically with zero physical contact
- 2** - Industry leading accuracy within one degree Celsius
- 3** - A digital indicator is shown to your staff to indicate the results of the scan (e.g., green light / red light)
- 4** - Ensures the safest possible environment for your business
- 5** - No physical contact or proximity required - safer and more hygienic than traditional thermometers
- 6** - Protects your staff from having to take multiple temperatures
- 7** - Promotes reassurance and peace of mind for both staff and customers
- 8** - The core of the unit is self-contained, making the design and structure fully customizable for your particular needs, examples shown below
